

Inspiring Excellence in Teaching & Learning

Empowering Educators; Engaging Learners; Inspiring Excellence

Our Mission

To advance excellence in teaching and learning by empowering educators with evidence-based pedagogies, innovative practices, and scholarly approaches that enhance student success, foster lifelong learning, and contribute to sustainable societal impact.

What We Offer

The Teaching and Learning Center (TLC) advances academic excellence by supporting evidence-based teaching through institutional reports, faculty development, student engagement activities, pedagogical researches and Teaching Excellence Awards.

Through these integrated mandates, the center fosters a culture of continued improvement, innovation and recognition that enhances the quality and impact of teaching and learning across the university.

Our Five Pillars

1 Reports Generation

TLC provides data-driven reports and insights tackling both students and faculty feedback to support informed decision-making, quality assurance, and continuous improvement in teaching and learning.

2 Research on Higher Education Pedagogies

TLC conducts and supports research on effective teaching pedagogies to advance evidence-based practices across the University.

3 Teaching Excellence Award

Every year, TLC proudly celebrates and awards exceptional educators whose passion, dedication, and impact inspire excellence in teaching and learning.

4 Student Engagement

TLC enhances student engagement through focus groups, job shadows, competitions and seminars that gather feedback, encourage participation, and enrich the learning experience.

5 Faculty Development

TLC supports faculty growth through targeted workshops and seminars designed to enhance teaching skills, innovation, and best practices in higher education. TLC organizes an annual Teaching and Learning Excellence Forum that presents a scholarly and collaborative platform, enabling educators and industry representatives to share practices, pedagogies and impactful experiences that enhance student learning and institutional effectiveness.

Why Teaching & Learning Center?

A collaborative partner in academic excellence

Innovative approaches to teaching and learning

Commitment to quality, impact, and continuous growth

“Empowering educators and elevating students by designing teaching and learning that matter, with lifelong purposeful impact.”
